

Personality marks the difference towards success

The track record of Fehrmann continues: Hamburg based ship supplier develops unique Flushline Sliding Door. / Family company with long tradition: Since 2008, Henning Fehrmann leads company in fifth generation. / Tradition and innovation successfully united. /

HAMBURG. With the development of the Flushline Sliding Door the Hamburg based company Fehrmann Metallverarbeitung GmbH expands its market leading role in supplying super yachts. The unique ship sliding door flushes with the lines of the outer ship bodyshell and opens up new tolerance to design solutions on megayachts. Flushline is the recent highlight of the 100 year track record. Henning Fehrmann is leading the company since 2008 and represents the fifth generation. For him, the development of the Flushline Sliding Door is also a great personal success: "To be the head of a company that my great-great grandfather established in the penultimate century – this is genuinely something special. With the Flushline Sliding Door we once more showed and proved our expertise."

The new door opens up completely new design opportunities for yachts. Until now, many design concepts fell victim and thus failed due to the necessity of functionality in ships; yet now design can not only follow the most important parameters of safety for a large yacht, but moreover meet the requests of aesthetics and wishes of customers. During many talks with yacht owners and designers, the road taken proved to be right. Mr. Henning Fehrmann explains: "I always wanted to develop a sliding door that provides more freedom to design. At this year's Monaco Yacht Show we talked to various representatives of the branch. Most of them were amazed and curious to see the door work; and I am sure that we will set new standards for sliding doors within world-wide yacht construction with this product." The company Fehrmann Metallverarbeitung already showed its ambition to unique products and innovation in the past: In the 1950s they equipped the famous M/S Christina, the world's first modern super yacht, with sliding windows. In 1983, Fehrmann developed fire resistant windows as the first company. Henning Fehrmann and his team will proceed on this road and will optimize the development of the Flushline Sliding Door. The new system is based on an intensive knowledge management between the several company departments. For the Hamburg company, which is having a world-wide reputation for Experience Excellence Engineering, it is always a serious goal to optimize the working and development processes. With the Flushline Sliding Door this aim was reached once more. Fehrmann underlines: "The development of the Flushline Sliding Door was only possible thanks to our healthy work atmosphere, where innovations can grow and face completion." A company with long tradition and highly respected values to be continued successfully – even more so in the new millennium.

A prototype of the door can be seen in Hamburg-Wilhelmsburg. At any interest of talking to Henning Fehrmann about the innovative Flushline Sliding Door, or if you like to see the door, please talk to the press consultant of Fehrmann Metallverarbeitung GmbH, Mr. Rafael Robert Pilsczek, via + 49 170 / 310 79 72.
